Dear Michelle,

The Monroe School District has been provided with a copy of a March 19, 2019 letter sent to you by counsel representing plaintiffs suing the Monroe School District for personal injury damages. That correspondence reflects the results of environmental testing done by expert witnesses retained by plaintiffs' attorney and includes a letter from an individual with a doctorate in chemistry, also retained by their attorney. The March 19, 2019 correspondence was not addressed to the Monroe School District. We were forwarded a copy by a community member.

Despite the origins of the data, following receipt Monroe School District contacted the Snohomish Health District to obtain guidance regarding the test results. We enclose a copy of a March 15, 2019 letter from the Snohomish Health District – Environmental Health Division. That letter indicates that the Health District had also consulted with the State of Washington Department of Health in regard to this data.

Monroe School District will follow the guidance the Snohomish Health District set forth in the attached letter.

Please contact us if you need further information or wish to discuss this matter.

Respectfully,

John Mannix
Assistant Superintendent, Operations
